

IOWA LEGISLATIVE SUPPORT

Quote from Congressman Bruce Braley – 1st District

"Often, vision problems in young children are overlooked," said Rep. Bruce Braley (D-IA)... InfantSEE® Week is a great opportunity for parents to have their infant children checked for potential eye and vision problems through a comprehensive eye and vision assessment. I urge all parents to take advantage of this opportunity."

Quote from Congressman Dave Loebsack – 2nd District

"I encourage parents across Iowa to take advantage of the InfantSEE® program," said Rep. Dave Loebsack (D-IA)... I applaud our local optometrists for providing free InfantSEE® assessments, and encourage families to take advantage of this useful service."

Quote from Congressman Leonard Boswell – 3rd District

"InfantSEE® is a terrific, preventative program for our infants", said Rep. Leonard Boswell (D-IA). "Currently less than 15% of children from infancy to age six have a comprehensive eye assessment. The American Optometric Association, in partnership with The Vision Care Institute™, LLC a Johnson & Johnson company, has designed a wonderful, worthwhile program. I commend all of the optometrists in the Des Moines area who are participating in the program, and encourage all parents with infants to make an appointment during InfantSEE® Week in Iowa."

Quote from Congressman Tom Latham – 4th District

"Vision and eye care are essential components of effective health care, and early detection of problems can make all the difference in treating a malady", said Rep. Tom Latham (R-IA)...

Quote from Congressman Steve King – 5th District

"An infant's visual development is vitally important, and I encourage Iowa families to take advantage of this free eye assessment", said Rep. Steve King (R-IA). "Protect your child by detecting vision problems early."
